

Lung Cancer Patient Priorities

Share your experiences of lung cancer to help improve healthcare for others, as part of a new Europe-wide project.

Why this project?

This project will create patient-led guidance outlining what matters most to people living with lung cancer so that their experience of treatment and care can be better understood and improved across Europe. Two sets of guidance will be produced:

1. *Guidance for healthcare professionals* will provide greater understanding of the experience of people living with lung cancer and offer recommendations on what is most important.
2. *Guidance for people living with lung cancer* will be based on the expertise of those who have experience of lung cancer, either as a patient or family member/carer, to share the things of most importance.

How can I share my experiences of lung cancer?

We hope people who have been diagnosed with lung cancer, their carers/family members, patient organisations and healthcare professionals will take part in consultation activities so that we get to hear as many views as we can from across Europe.

The guidance will be based on these patient experiences and their expertise so make sure your voice is heard by taking part in one or more of the following:

- A workshop for people diagnosed with lung cancer and carers/family members in Europe
- An online survey for patients/carers throughout Europe (in a range of languages)
- A telephone/skype interview
- Patient/carer face-to-face discussion groups
- Social media activity including online discussions
- Telling and/or recording your patient story

Find out when consultation activities are taking place and how you could get involved by emailing jeanette.boyd@europeanlung.org or telephone +44 114 267 2872
